NEW YORK, December 3.—Prices of stocks turned upwards to-day Without any well defined explanation for the reversal of yesterday's course. The influences in the market were for the most part denials of assertions current yesterday which caused prices to decline, which were depressing the market yesterday. Late in the day came a report from Chicago that the switchmen's strike had been actually settled. The hopeful feeding on this matter relieved the market from considerable pressure.

There was a beneficial feeling on the subject of the forthcoming message to Congress. It was said to-day that yesterday's reports from Washington of radical recommendations to be incorporated in the message were not well founded. This tendency to reverse the opinion of things was taken to point to a professional origin for much of the dealings in the market.

The announcement of the acquisition of a majority of the stock of the Equitable and the Mercantils Trust Companies involved, was of imposing effect. The prodigious centralization in the directing power of credit institutions resulting from this suggests a line of policy dominant in the foremost financial minds of the country, which seems to indicate confidence in exemption from effective interference in the processes of combination and consolidation. The incident was an underlying influence on the stocks of rail roads of connideralle force. A resumption of the dealings and the rising scale was not checked at the close.

Call money rate did not get above 5 per cent, and this somewhat easier tone in that department was regarded as a favorable forceast of the bank to the stocks of rail roads of connideralle force. A resumption of the dealings and the rising scale was not checked at the close.
